To Whom It May Concern,

I am pleased to recommend Xhoana Koca, who volunteered with [Virufy](#) as a member of our Web Development Team. As the Founder and President of Virufy, I had the opportunity to see Xhoana grow significantly during her time with our organization and take on increasing responsibility within our web development team.

Xhoana initially joined Virufy with limited experience in web development, but she quickly demonstrated a strong willingness to learn, take on new challenges, and develop her technical skills. As our team evolved and several members moved on, she stepped into a larger role within web development and took on responsibility for managing three developers from Stanford and CUNY.

Xhoana played an important role in building and maintaining [Virufy.org](#), a website that served audiences across more than 10 countries. She worked closely with our UI/UX team to translate Figma prototypes into functional web pages and collaborated directly with executive stakeholders on frontend data collection and website requirements.

During her time with Virufy, our development team also transitioned from traditional HTML development to Gatsby. Xhoana embraced this transition, participated in the necessary training, and quickly learned how to develop and maintain our website using Gatsby. Her ability to adapt to new technologies and changing team needs was one of her notable strengths.

Throughout her time volunteering with Virufy, Xhoana demonstrated initiative, dedication, adaptability, and a strong commitment to learning. She consistently took on greater responsibility as our team evolved and made meaningful contributions to our web development efforts. In recognition of her work and willingness to go above and beyond, we awarded Xhoana the **Extra Mile Award** for excellence in web development.

I believe Xhoana would be a valuable addition to any organization. She brings technical skills, adaptability, initiative, leadership experience, and a strong commitment to continued learning. I am happy to recommend Xhoana for opportunities in technology, web development, business analysis, and related fields, where I am confident she will continue to grow and make meaningful contributions.

Sincerely,

Amil Khanzada
President, Virufy, California, USA
